

Lesson 2

FORM: *This Equals That*

VISUAL DOMINOES

How to play: Find a color in one of these photographs (ex. red). Place it next to another photograph that has red in it. Now find a shape in the second photograph. Place a photograph that has that same shape in it next to that one. Keep going like this, trying to find harder elements (ex. composition or focus)—color and shape are usually the easiest to notice. The following photographs were taken by students who have participated in the Aperture On Sight program.
